State Government

BRIDGING INFORMATION PROCESSES

iBridge Group provides Business Process Management services and solutions to the public sector. We provide State agencies with efficient and highly secure solutions to manage core business documents and records.

State agencies of today face new challenges with required knowledge transition to a new generation of workers, legislative expectations to quickly implement mandates, increasing regulations to meet compliance and most recently the pressure to become more efficient during the economic downturn.

“Automated business processes translate to measurable productivity gains...”

With iBridge, state agencies can increase the value of client interaction with expanded and self-service offerings and improved customer service through managing and automating business processes. Automated business processes translate to measurable productivity gains and the necessary infrastructure to reduce operating costs.

RECOGNIZED BENEFITS

- Deploy technology that is built for change and meets the most strict governance and compliance standards
- Ability to allow program areas/business units to change rules and calculations with minimal IT involvement
- Reduction in time and cost associated with modernization efforts
- Improve processes with integrated case management views
- Assist in compliancy with 508 accessibility framework

WORKING WITH iBRIDGE

iBridge makes it easy for Texas government entities to obtain our software and services through our Texas DIR contracts.
