

iBridge Group and Microsoft Partner to Provide Return to the Workplace Power Platform App Services

Providing simple, easy to use tools that promise to transform digital infrastructure for IT teams and employees.

Austin, TX – October 30, 2020 – iBridge Group, Inc., is partnering with Microsoft to assist businesses and organizations return safely to the workplace. With employee and organizational safety at the core of the partnership, our goal is to give people the confidence to meet in person with a pre-built solution designed to protect teams and streamline the entire reopening of the workplace process. The Microsoft Power Platform return to workplace solution will help prepare your workforce transformation by the empowerment of facility managers and task force leaders to plan for and make informed decisions to safely reopen locations; giving employees self-service tools to help them work safely, confidently, and productively; quickly and easily helping health and safety leaders maintain the health and safety of the workforce and workplace; helping facility managers with tools to keep locations open safely; and utilizing New Power Platform skills to help your organization adopt a new way of quickly creating apps and automation.

Easy-to-use Microsoft Power Platform App Services enable:

- Location Readiness determines the readiness of facilities and efficiently manage safe reopening. Location Readiness allows facility managers and task force leaders to quickly make informed decisions using critical factors like COVID infection rates and supplies availability.
- Location management gives facility managers the tools they need to keep locations open safely. Facility safety management helps maintain a safe environment with tools for monitoring occupancy, health supplies, safety procedures, and other facility-related best practices.
- Employee health and safety management offers workforces the self-service tools needed to feel confident about returning and remain productive while onsite. Allows employees to look up facility status and workspace availability and self-screen and attest to the state of their health before entering a building.
- Workplace care management gives health and safety leaders tools to actively manage COVID-19 cases, identify hot spots for safety improvement, and import data from third party systems to determine exposure. Executive dashboards enable monitoring of all Workplace Care Management data.

"We are here to partner with and solve the business challenges of our clients as we adapt to meet the challenges that COVID19 presents." – Jennifer Cumpian, iBridge Group CEO

About Microsoft

Microsoft is an American multinational company and leading provider of information management solutions that develops, manufactures, licenses, supports, and sells computer software, consumer electronics, personal computers, and related services. Its best-known software products are the Microsoft Windows line of operating systems, the Microsoft Office suite, and the Internet Explorer and Edge web browsers.
